

Inaccess to showcase its next generation solar PV monitoring platform in the upcoming Solar Energy UK show in Birmingham, 14-16 October 2014

London, UK, Oct. 6, 2014 – Inaccess, the leading vendor independent PV monitoring provider, announces the launch of its new generation solar PV platform which will be showcased in *Solar Energy UK 2014*.

With the new platform, Inaccess defines the next level in Solar Monitoring & Control by integrating full scale BI analytics and Asset Management workflow on its global portfolio management platform.

The new monitoring platform combines Inaccess structured KPIs and scale along with PVSense flexibility into a single platform, providing enhanced features and unique visualization capabilities.

Visitors of the show in Birmingham will be able to experience how the platform enables operation, maintenance and performance optimization of a solar asset owner's diverse portfolio. The platform further offers integration with Enterprise Asset management systems to enable operations and maintenance of solar PV assets as well as Business Intelligence platforms with enhanced reporting, array analytics and data quality assessment applications.

Christos Georgopoulos, Inaccess CEO commented: "Following the successful integration of SenseOne Technologies UK and PVSense product in the first half of 2014, it is exciting for us to see very positive feedback of our new generation solar monitoring solution for utility-scale plants, enhanced with O&M, analytics and active power management features.

We are excited to be part of Solar Energy UK 2014 at Birmingham and we look forward to meeting with our existing and prospect clients to present the enhanced features, unique capabilities and new functionality of Inaccess monitoring platform."

Inaccess is currently monitoring more than 1300 solar plants with a total capacity exceeding 2 GW in US, Europe and Asia.

About Inaccess

Inaccess provides monitoring and control solutions for the renewable energy and telecom infrastructure management.

We design and develop state-of-the-art products and solutions, which provide our partners with invaluable access to information, enabling them to maximize effectiveness of their investments through performance optimization and OPEX reduction. With headquarters in London, UK and presence in Europe, North America and Asia, Inaccess aims at becoming the leading global vendor of converged infrastructure monitoring platforms, by constantly being at the forefront of industry evolution.
